S. No	Product	Idea/Usecase
2	API	**Voice Agent QA Platform:** - Platform to simulate thousands of real-world conversations to stress-test voice agents before launch, covering edge cases like interruptions, noisy audio, policy violations, and difficult callers - Monitor production calls by agents, evaluating live conversations for latency, hallucinations, compliance, resolution rate, sentiment, and other quality metrics to detect failures early - Continuously improve agent performance through automated evaluations, human QA review, regression testing, and actionable insights so every release is more reliable than the last
3	API	**LLM Knowledge Pipeline:** - Extract and structure knowledge from PDFs, documents, and manuals into an AI-ready format - Generate high-quality training or RAG datasets by creating instruction-answer pairs, metadata, and citations automatically - Evaluate and improve dataset quality through deduplication, chunking, hallucination checks, and retrieval benchmarking
4	API	**Document Intelligence Agent:** - Extract and structure data from PDFs, forms, invoices, reports, and scanned documents into a unified, queryable dataset - Generate insights and dashboards by transforming unstructured document data into analytics-ready formats for BI and visualization tools - Automate business workflows by triggering alerts, approvals, reports, and downstream actions from extracted information
5	API	**AI Avatar Tutor:** - Teach through lifelike AI avatars with expressive voice, gestures, and multilingual conversations. - Explain concepts visually using whiteboards, diagrams, documents, and interactive demonstrations. - Personalize every session with adaptive questioning, instant feedback, and progress tracking.
6	API	**Citizen Services Agent** - Answer citizen queries about government schemes, taxes, pensions, and certificates in regional languages. - Assist with applications by collecting information, verifying documents, and guiding users step-by-step. - Track requests and provide proactive status updates through voice, WhatsApp, or phone calls.
7	Conversation	**Sales Agent:** - Automates outbound customer outreach through AI voice and messaging for lead qualification, reminders, bookings, and follow-ups - Handles natural multilingual conversations, answering queries, qualifying leads, and escalating to human agents when needed - Integrates with business systems like CRMs and calendars to automate workflows and keep customer data up to date
8	Conversation	**Personal AI Call Assistant:** - Answer and screen incoming calls with natural voice conversations, identifying caller intent and filtering spam or low-priority calls - Act on the user's behalf by answering questions, collecting information, scheduling follow-ups, or seamlessly transferring important calls to the user - Generate actionable call summaries with key insights, action items, and conversation history to help users stay informed without answering every call
8	Conversation	**Healthcare Agent:** - Automates patient intake and scheduling with appointment booking, confirmations, and reminders - Engages patients proactively through follow-ups, care reminders, and re-engagement campaigns - Supports insurance workflows with cashless insurance verification, pre-authorization updates, and claims coordination
9	Conversation	**AI Recruiting Agent:** - Run autonomous first-round interviews that qualify candidates, probe deeper with follow-up questions, evaluate competencies, and produce structured hiring recommendations. - Manage the recruiting lifecycle by automating candidate outreach, interview scheduling, recruiter coordination, application tracking, and personalized status updates through natural voice conversations.
10	Conversation	**Elder Companion Agent:** - Check in on seniors daily through friendly voice calls covering wellbeing, mood, meals, and medication in their regional language. - Support health and safety by reminding about medicines and appointments, capturing symptoms, and warning against scams and fraudulent calls. - Keep families informed with daily wellbeing summaries and proactive alerts for missed calls, health red flags, or emergencies via WhatsApp or phone.
11	Conversation	**Wellness Coach:** Automates daily health tracking with proactive check-in calls for food intake, workouts, and sleep — capturing everything by voice, no app logging required Engages users continuously through personalized nudges, missed-workout follow-ups, and adaptive plan adjustments based on progress and energy levels Supports holistic coaching with voice-based nutrition estimation, macro and calorie tracking, sleep-quality guidance, and trend-based recommendations across code-mixed Indian languages
12	Agents	**Clinical Multi-Agent System** - Orchestrate specialized AI agents for patient intake, clinical reasoning, medical knowledge retrieval, diagnostics, and documentation across the care journey - Coordinate multimodal clinical data by analyzing patient records, lab results, imaging, prescriptions, and clinical guidelines to generate unified insights - Support clinical decision-making with evidence-backed recommendations, explainable reasoning, and seamless handoffs between AI agents and healthcare professionals
13	Agents	**AI DevOps Operations Agent** - Monitor infrastructure, applications, and deployments by correlating logs, metrics, alerts, and traces to detect incidents in real time - Automate incident response through root cause analysis, alert prioritization, code change analysis, and actionable remediation recommendations - Manage engineering operations by enforcing access policies, validating deployments, monitoring system health, and orchestrating recovery workflows across developer tools and cloud infrastructure
14	Agents	**Marketing AI Coworker** - Deploy specialized AI agents for SEO optimization, ad campaign analysis, keyword research, and content generation to execute end-to-end marketing workflows - Collaborate with marketing teams by reviewing website performance, optimizing campaigns, generating high-converting copy, and recommending growth opportunities - Continuously monitor and optimize search rankings, ad performance, content quality, and campaign ROI through autonomous analysis and actionable recommendations
15	Agents	**Finance Operations Agent** - Orchestrate specialized AI agents for accounts payable, accounts receivable, reconciliations, and financial close across ERP and accounting systems - Automate financial workflows by processing invoices, tracking payments, reconciling transactions, and preparing journal entries and financial records - Accelerate month-end close with anomaly detection, compliance checks, audit-ready reports, and AI-assisted book preparation
16	Agents	**Incident Response Agent** - Correlate alerts, logs, traces, and recent deployments - Identify the likely root cause - Open remediation PRs, rollback deployments, or create incident reports
17	Creatives	**AI Podcast Generator:** - Generate complete podcast episodes from a simple prompt, document, or topic, including research, script writing, and episode structure. - Produce natural, multi-speaker conversations using Bulbul and custom voices with realistic dialogue, pacing, and narration. - Create production-ready audio with voice customization, multilingual support, background music, and export-ready episodes.
18	Creatives	**Text-to-Speech Content Reader:** Convert articles, documents, or scripts into natural-sounding narrated audio using Bulbul and custom voices. Support multilingual narration with adjustable tone, speed, and emphasis for different content types (news, fiction, education). Auto-generate audio versions of written content (blogs, newsletters, docs) for accessibility and repurposing.
19	Creatives	**Voice Time Capsule:** Clone a grandparent's or parent's voice from old recordings/WhatsApp voice notes. Generate new content in that voice, bedtime stories, birthday wishes, advice, for years after the fact.
20	Creatives	**Voice Journal Narrator:** Turn written journal or diary entries into narrated audio memories in the user's own voice. Compile entries into periodic "audio memoirs" a monthly or yearly spoken recap of one's own year. Useful as a personal reflection tool or a shareable audio keepsake for family archives.
21	Creatives	**Language Coach with Your Own Voice:** Clone a learner's voice, then generate correct pronunciation of new vocabulary or phrases in their own voice. Removes the awkwardness of hearing a stranger's voice while learning, you hear yourself speaking correctly. Works across Indian languages for accent and pronunciation practice.
22	Pages	**Intelligent Underwriting Agent** - Cross-verify data across applications, bank statements, KYC documents, income proofs, and insurance records - Analyze each document independently to identify inconsistencies, missing information, and potential fraud - Deliver an explainable underwriting recommendation with supporting evidence, risk assessment, and approval or escalation decisions
23	Pages	**Stamp Intelligence Agent** - Extract stamps, seals, and signatures from documents - Validate authenticity, placement, and document compliance - Trigger automated approval, rejection, or fraud review workflows

24	Pages	**Accounts Payable Agent** - Extract and validate invoice data from documents - Match invoices with purchase orders and flag discrepancies - Automate approvals and payments through ERP workflows
25	Pages	**Tender Bidding Agent** - Analyze tender documents and extract key requirements, deadlines, and eligibility criteria - Generate bid responses using company knowledge, past proposals, and supporting documents
26	Pages	**Heritage Storytelling Agent** - Transcribe and translate historic manuscripts and oral archives - Transform historical content into interactive stories, podcasts, or guided tours - Bring history to life with natural multilingual voice narration
27	Saaras, Bulbul, Sarvam-105B, Sarvam Vision	Bank on a Phone Call: - Voice-first loan agent for feature phones conducting natural conversations in Indic languages (Saaras v4, Sarvam-105B, Bulbul v3) - Ingests and verifies KYC / income proof photos (Sarvam Vision) and compares loan products sourced directly to bank policy clauses - Fills application forms and manages end-to-end status tracking over phone calls
28	Sarvam Vision, Saaras	Claim-It (Insurance Claim Copilot): - Policyholders narrate hospitalisation or accident events by voice in their preferred language - Extracts policy documents and parses crumpled, handwritten bills to verify coverage clauses (Sarvam Vision) - Identifies missing documentation, drafts claims, and pre-fills insurer submission forms
29	Saaras, Bulbul, Sarvam-105B	Scheme-to-Pocket Benefit Finder: - Voice agent that interviews gig workers and delivery riders about income, city, and family - Cross-references EPFO, insurance, and pension schemes tailored for gig economy workers - Explains benefits in simple spoken regional language and completes the full signup journey
30	Saaras, Bulbul, Sarvam-105B	Aawaz se Diagnosis (Spoken Misconception Detector): - Transcribes student spoken reasoning using Saaras and classifies underlying misconceptions via Sarvam-105B - Re-teaches concepts adaptively using alternate modalities such as stories, number lines, and real-life analogies - Generates targeted spoken practice drills via Bulbul and updates per-skill student mastery graphs
31	Sarvam-105B	Bhasha Doubt Solver: - Interactive doubt solver that prompts students to explain their thought process before guiding them - Detects conceptual misconceptions and maintains a persistent longitudinal learner model - Adapts future explanations based on prior error history rather than providing direct answers
32	Saaras, Bulbul	Read-Aloud Fluency Coach: - Listens to early readers reading passages aloud and scores fluency and mispronunciations via Saaras - Models accurate native pronunciation and intonation across Indic languages using Bulbul v3 - Generates targeted phoneme-level follow-up drills and tracks words correct per minute over time
33	Sarvam Vision	Record → Claim → Anchor Pipeline: - Extracts structured claims and confidence scores from land records, birth registers, or certificates using Sarvam Vision - Hashes original images and extracted claims, anchoring Merkle roots on a verifiable tamper-evident log - Generates verifier QR codes allowing third parties to audit AI extractions directly against original evidence
34	Sarvam Vision	Degree Verification Network: - Digital verification workflow for academic credentials and certificates replacing paper-based processes - Anchors verified certificate claims with tamper-evident cryptographic hashes and confidence scores - Enables employers and universities to inspect extracted fields side-by-side with raw document crops
35	Sarvam Vision	NGO Fund-Flow Receipt Integrity: - Digitizes and anchors disbursement receipts for scholarships and subsidies onto a verifiable ledger - Employs Sarvam Vision for multilingual OCR and automated receipt metadata structuring - Creates a transparent, publicly queryable integrity layer tracking public and philanthropic fund flows
36	Saaras, Sarvam Vision	Dispatcher-in-Your-Pocket: - Transcribes multilingual driver voice notes or IVR calls reporting transit delays via Saaras - Converts voice notes into structured logistics events and cross-references trip invoices via Sarvam Vision - Triggers automated operational actions (rerouting, customer alerts) with human escalation on low confidence
37	Sarvam Vision, Saaras	Voice Proof-of-Delivery: - Enables delivery agents to capture voice confirmation alongside photos of paper proof-of-delivery documents - Sarvam Vision parses consignee names and signatures while voice input serves as an auditable legal artifact - Automates instant delivery verification and exception flagging across logistics networks
38	Sarvam Vision, Sarvam-105B	Freight-Invoice Reconciliation Agent: - Automatically extracts line items, taxes, and amounts from supplier invoices using Sarvam Vision - Reconciles invoice details against purchase orders to flag mismatches in price, quantity, or GST - Drafts multilingual dispute and clarification emails directly to suppliers in their language
39	Saaras, Sarvam Vision, Sarvam-105B	Sunniye, Samjhiye (Patient Intake Storyteller): - Records patient narratives in regional languages during OPD triage and parses prior scrawled prescriptions - Generates a two-column clinical summary separating verbatim extracted facts from AI hypotheses - Links clinical facts directly to originating audio timestamps and captures doctor sign-off artifacts
40	Sarvam Vision, Bulbul	Discharge-Summary Decoder: - Ingests complex hospital discharge summaries and insurance pre-authorization letters via Sarvam Vision - Translates medical terminology into clear, accessible spoken explanations via Bulbul v3 - Generates actionable weekly post-discharge recovery checklists and schedules follow-up consultations
41	Saaras, Bulbul, Sarvam-105B	Missed-Dose & Follow-Up Companion: - Automated outbound voice agent checking on post-discharge rural patients in their native languages - Conducts structured non-diagnostic check-ins regarding medication adherence, symptoms, and appointments - Proactively escalates anomalies and missed doses to supervising healthcare coordinators
42	Saaras, Sarvam Vision, Sarvam-105B	Signal Fusion Board: - Aggregates multi-channel crisis reports including voice notes, SMS, flood photos, and handwritten notes - Deduplicates incoming reports, resolves vague geographic mentions to map coordinates, and ranks severity - Delivers an operational dashboard linking every prioritized incident directly to raw evidence trails
43	Saaras, Bulbul, Sarvam-105B	Offline-First Citizen Reporter: - Enables emergency reporting via missed calls and SMS in low-bandwidth or network-dead zones - Queues reports locally and synchronizes automatically with emergency fusion boards upon reconnection - Triggers automated voice and text safety advisories in callers' regional languages
44	Sarvam-105B	Needs-to-Relief Matcher: - Extracts critical relief requirements from structured incoming disaster incident reports - Matches real-time community needs against available emergency relief supplies and warehouse inventories - Formulates prioritized dispatch recommendations and logistics routing for first responders
45	Sarvam Vision, Bulbul, Saaras, Sarvam-105B	Sarkari Sahayak (Scheme Journey Agent): - Conversational agent identifying eligible government welfare schemes through official RAG retrieval - Explains eligibility criteria, parses applicant KYC documents (Sarvam Vision), and highlights missing items - Guides citizens step-by-step through form completion with spoken field confirmation via Bulbul
46	Saaras, Sarvam-105B	Grievance Drafter: - Converts unstructured citizen voice complaints into well-structured, cited administrative grievances - Formats complaints to match CPGRAMS standards with clear problem statements and relevant department tags - Enables citizen tracking and updates across resolution lifecycles
47	Sarvam Vision, Sarvam-105B	RTI Copilot: - Assists citizens in framing formal Right to Information (RTI) applications through guided dialogue - Grounds all requests in uploaded government records, public notices, and official documentation - Generates legally compliant RTI draft applications ready for submission in regional languages
48	Saaras, Sarvam Vision, Sarvam-105B	OSINT Fusion Workbench: - Ingests multilingual intelligence inputs including news articles, police reports, and intercepted radio audio - Extracts entities and constructs cross-lingual knowledge graphs linking actors, events, and locations - Highlights weak-signal patterns with confidence scoring and preserves analyst verification controls

49	Sarvam-105B, Sarvam Translate	Cross-Lingual Misinformation Triage: - Traces the spread of viral claims across multilingual social posts, messaging channels, and news media - Evaluates factual claims against verified evidence repositories with explainable source citations - Assigns objective consistency scores supported by side-by-side multilingual excerpts
50	Sarvam Vision	Incident-Report Digitiser with Integrity Checks: - Transforms unstructured, multilingual physical incident reports into structured digital events - Generates cryptographic verification hashes and auditable links to original scanned reports - Ensures evidence chains remain tamper-proof throughout aggregation into broader intelligence pictures
